Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 21 December 2006 has been entered.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 6 through 11, 13 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Blevins (U.S. Patent Publication No. 2001/0044965 A1) in view of Kuck et al. (U.S. Patent No. 4,653,129).

Blevins '965 teaches all of the features of the claimed invention with the exceptions of a railing and two L-shaped arms.

Kuck et al. '129, as best seen in Figures 1 through 3, show a patient bed attachment (40) comprising a railing (50) and two L-shaped arms (the combination of elements 42 and 62; col. 4,

Art Unit: 3671

lines 20 through 27), wherein each L-shaped arm has a first end connected to said railing and a second end pivotally connected to the bottom surface of a patient support surface, the L-shaped arm rotating about an axis substantially parallel to the side edges of the patient support (col. 4, lines 27 through 50), wherein the purpose of the attachment is to provide a stretcher with a raisable and lowerable rail assembly for protecting patients (col. 1, lines 6 through 11).

With regard to claims 6 through 11, 13 and 14, it would have been obvious to one having ordinary skill in the art at the time of invention to modify the device disclosed by Blevins '965 such that it would include the railing and L-shaped arms shown by Kuck et al. '129. The motivation would have been to provide the patient lifting device with a raisable and lowerable side rail assembly for protecting patients.

Comments

4. Applicant is advised to carefully review the claim identifiers (e.g., Original, Currently Amended, etc.) when filing a response.
